

Help us turn over a new leaf in plaque psoriasis

- Are you 18 years of age or older?
- Do you have moderate to severe chronic plaque psoriasis?
- Have you had this condition for at least six months?

If you can answer 'yes' to these questions, then we would like to hear from you.

We are currently looking for people with moderate to severe chronic plaque psoriasis who may be interested in joining a clinical research study called the **BE VIVID** study.

The **BE VIVID** study is testing an investigational medication called bimekizumab to see if it is safe and effective in treating plaque psoriasis.

If you qualify for the study, study medications and all study-related care will be provided at no cost to you.
